

Hydrotek Engineering Company

Hydrotek Engineering Company is a subsidiary of Al Injazat Holding Company KSCC., a trading company for equipment related to:

(a) Infrastructure projects (sewage treatment plants, water, waste water, and treated effluent pumping stations, conveyance lines, etc.) including pumps, valves, penstocks, pipes & fittings, UV sterilization plants, GLS & GRP tanks, packaged type sewage treatment plants, RO units, odour control stations and surge vessels among many other products.

(b) Plumbing and fire fighting projects (for commercial and residential complexes, hotels, hospitals, high rise towers, etc.) including GRP tanks, pump sets (transfer and booster, fixed and variable speed) water treatment equipment (media filters, softeners, cartridge filters, UV sterilizers, RO units), water heaters, circulator pumps, drainage pipes (HDPE & stainless steel), water supply pipes (pp-R & polybutylene), floor drains and plumbing specialties (cast iron, stainless steel, and PVC), control valves (modulating and delayed action float valves, pressure reducing, pressure sustaining, pressure relief, and altitude valves), gate and check valves, sewage and rain water pump sets, fire fighting pumps, and fire pressure reducing and pressure relief valves.

(c) Dewatering projects including bore well casings, submersible borehole pumps and motors, trash pumps, electric and diesel vacuum assisted pumps, PVC riser pipes, and submersible cables.

(d) Irrigation projects including PVC pipes and fittings in both ASTM and DIN standards, HDPE pressure pipes and fittings, irrigation equipment, and outdoor cooling equipment, in addition to GLS & GRP water tanks, pumping stations, media and screen filters, and valves & control valves.
